S2-P8H61E BIOS UPDATE

To determine if your computer supports Intel 3rd Gen Ivy Bridge CPU, please kindly check the following points:

1. If there is one Intel 3rd Gen Label on the bezel of the machine, and another one on the outside of the carton. It means your system supports Ivy Bridge CPU.

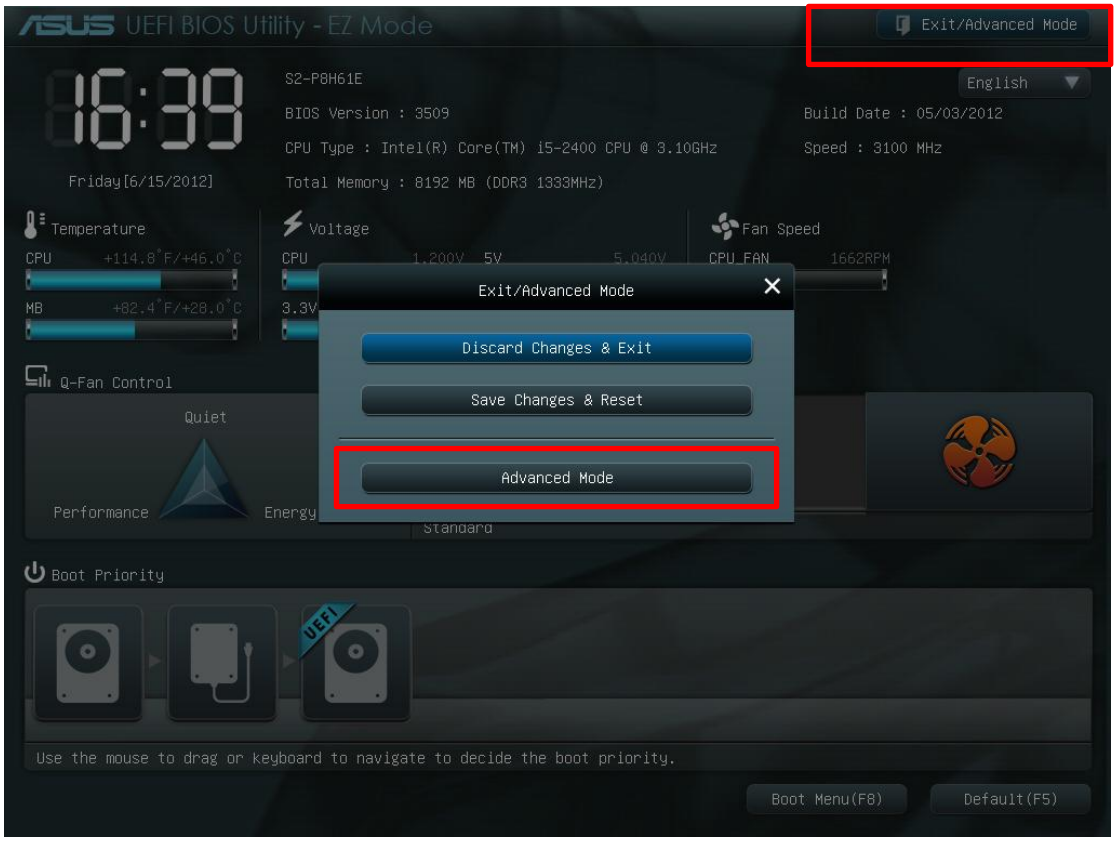
2. Check your BIOS Version.

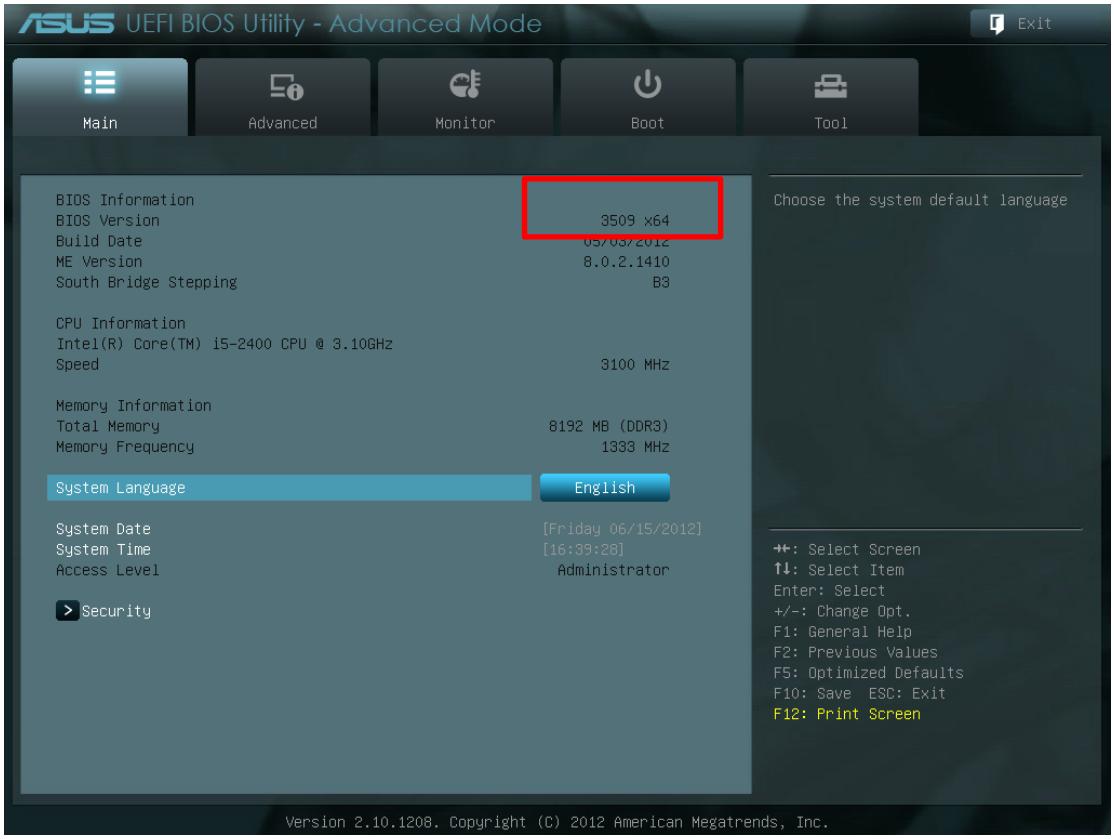
※ If your BIOS version is 3509 or above, it means your system can support Ivy Bridge CPU.

※ If your **BIOS version is 04xx (e.g. 0406 or 0401)**, it means your system is Sandy Bridge Platform and it **DOES NOT support Ivy Bridge CPU**. Then you must contact ASUS CSC or your vendor for "BIOS UPDATE TOOL SET". Thank you very much for your understanding!

B-1. How to check your BIOS version:

(1) Click on the up and right corner to enter Advanced Mode.





(3) You can check your BIOS version in the Main page of Advance Mode.
